

CONTENTS

V. ALEXIADES, D. G. WILSON, AND A. D. SOLOMON: Macroscopic global modeling of binary alloy solidification processes	143
V. ALEXIADES (<i>see</i> A. D. SOLOMON)	
B. S. BERGER: Velocity and vorticity correlations	97
S. N. BHATTACHARYYA AND A. S. GUPTA: On the stability of viscous flow over a stretching sheet	359
W. E. BLEICK: Note on 120 degree axial coordinates	125
L. M. BROCK: The dynamic 2D analysis of a concentrated force near a semi-infinite crack	201
TIMOTHY J. BURNS: Approximate linear stability analysis of a model of adiabatic shear band formation	65
R. S. CHADWICK: Asymptotic analysis of Stokes flow in a tortuous vessel	325
R. S. CHADWICK: Slow viscous flow inside a torus—The resistance of small tortuous blood vessels	317
O. P. CHANDNA AND N. RUDRAIAH: Solutions for steady plane aligned electro-magneto-gasdynamics	85
CORRIGENDA: "A numerical technique for the solution of singular integral equations of the second kind," G. R. Miller and L. M. Keer	127
GEORGE DASSIOS AND KIRIAKIE KIRIAKI: The rigid ellipsoid in the presence of a low frequency elastic wave	435
W. A. DAY: Maximum and minimum properties of the temperature in linear thermoelasticity	159
JEFFREY N. DEWYNNE (<i>see</i> JAMES M. HILL)	
H. T. DOAN: Invariant curves for numerical methods	385
B. D. DORE: A theory for the wave-induced motion of finite monomolecular films	37
J. DRAKE (<i>see</i> A. D. SOLOMON)	
K. GOPALSAMY: Nonoscillation in a delay-logistic equation	189
K. GOPALSAMY: Nonoscillatory differential equations with retarded and advanced arguments	211
A. S. GUPTA (<i>see</i> S. N. BHATTACHARYYA)	
HARUMI HATTORI: On the properties of entropy rate in the entropy rate admissibility criterion	305
GASTÓN HERNÁNDEZ: Existence of solutions in a population dynamics problem	509
JAMES M. HILL AND JEFFREY N. DEWYNNE: A note on Langford's cylinder functions $c_n(z, z_0)$ and $e_n(z, z_0)$	179
W. J. HRUSA AND M. RENARDY: On wave propagation in linear viscoelasticity ...	237
R. R. HUILGOL: On the mechanical inadmissibility and thermodynamic admissibility according to the Clausius–Duhem inequality of the unbounded shear flow of a second-order fluid with negative stress power	431
R. KANT AND S. K. MALIK: Nonlinear electrohydrodynamic instability of a jet ..	407
RAMA KANT (<i>see</i> S. K. MALIK)	
KIRIAKIE KIRIAKI (<i>see</i> GEORGE DASSIOS)	
W. KLIEM AND CHR. POMMER: On the stability of linear nonconservative systems	457
ROBERT V. KOHN AND MICHAEL VOGELIUS: A new model for thin plates with rapidly varying thickness. II: A convergence proof	1
TAKAŠI KUSANO AND NORIO YOSHIDA: Forced oscillations of Timoshenko beams	167
ROBERT LEVY: On the optimal design of trusses under one loading condition	129

CHIH-BING LING: On the potential in a strip with a pair of U notches	257
S. K. MALIK AND M. SINGH: Modulational instability in magnetic fluids.....	57
S. K. MALIK AND RAMA KANT: Second harmonic resonance in electrohydro- dynamics.....	401
S. K. MALIK (<i>see</i> R. KANT)	
A. R. MANWELL: Unsteady transonic flows in an axial flow compressor	369
N. MOSTAGHEL: A response bound for hysteretic second-order systems	199
P. M. NAGHDI AND L. VONGSARNPIGOON: Some general results in the kinematics of axisymmetrical deformation of shells of revolution	23
S. NAIR: Heat conduction in a thin circular pipe due to a circumferentially moving heat source.....	421
S. NEMAT-NASSER AND M. TAYA: On effective moduli of an elastic body containing periodically distributed voids: Comments and corrections.....	187
VARUGHESE PHILIP (<i>see</i> P. L. SACHDEV)	
CHR. POMMER (<i>see</i> W. KLIEM)	
R. QUINTANILLA AND H. T. WILLIAMS: An existence and uniqueness theorem for incremental viscoelasticity	287
H. RAMKISSOON: On a planar exterior problem in linear elasticity	135
M. RENARDY (<i>see</i> W. J. HRUSA)	
N. RUDRAIAH (<i>see</i> O. P. CHANDNA)	
P. L. SACHDEV AND VARUGHESE PHILIP: Invariance group properties and ex- act solutions of equations describing time-dependent free surface flows under gravity.....	463
D. C. SHAW: Some aspects of the French flexible bag wave-energy device	337
EL SAYED F. EL SHEHAWAY: Electrohydrodynamic solitons in Kelvin-Helmholtz flow: The case of a normal field in the absence of surface charges	481
M. SINGH (<i>see</i> S. K. MALIK)	
A. D. SOLOMON, V. ALEXIADES, D. G. WILSON, AND J. DRAKE: On the formula- tion of hyperbolic Stefan problems	295
A. D. SOLOMON (<i>see</i> V. ALEXIADES)	
S. S. SRITHARAN: Delta wings with shock-free cross flow	275
D. THANGARAJ AND S. N. VENKATARAMAN: Dual extremum principles for a class of interface problems	501
M. TAYA (<i>see</i> S. NEMAT-NASSER)	
N. M. TEMME: Laplace type integrals: Transformation to standard form and uniform asymptotic expansions	103
M. TOULIOS: The wavefront induced in a homogeneously shearing solid by a local- ized material imperfection	225
F. E. UDWADIA: Some results on the optimal spacing of measurements in the identification of structural systems	263
S. N. VENKATARAMAN (<i>see</i> D. THANGARAJ)	
MICHAEL VOGELIUS (<i>see</i> ROBERT V. KOHN)	
L. VONGSARNPIGOON (<i>see</i> P. M. NAGHDI)	
C. Y. WANG: Stagnation flow on the surface of a quiescent fluid—An exact solution of the Navier-Stokes equations.....	215
H. T. WILLIAMS (<i>see</i> R. QUINTANILLA)	
D. G. WILSON (<i>see</i> V. ALEXIADES)	
D. G. WILSON (<i>see</i> A. D. SOLOMON)	
NORIO YOSHIDA (<i>see</i> TAKAŠI KUSANO)
